## **EXHIBIT "A"**

This application is being filed in order to provide water for the proposed Lahontan Business Park on the applicant's property near Hazen, Nevada. This is the only one of it's kind in Churchill County with both rail service adjacent to the Southern Pacific mainline and a large supply of potable underground water. As such it is an important asset in the continued economic development of Churchill County.

As initially designed, the proposed park will consist of 5 to 10 acre building sites with both rail and roadway service. Primary development will be concentrated within Section 35, T.20N., R.26E., M.D.B. & M. of the proposed place of use.

The water system to service these lots will consist of a 12" mainline distribution system and a 1.3 million gallon storage tank. A sewer and storm drain system is to be constructed which will feed a 422,000 gallon capacity wastewater treatment plant constructed on site.

All wells will be reequipped and upgraded in order to provide the necessary flows to supply this project.

In summary, this is a high quality project designed to both put the water under these applications to beneficial use and to enhance the economic viability of Churchill County.

For the existing point of diversion and place of use, refer to the map filed under Permit 50442.
